Service Manual

PRODUCT INFORMATION

- This product meets the requirements regarding interference suppression on radio and TV.
- After the product has been repaired, it should function properly and has to meet the safety requirements as officially laid down at this moment.

TECHNICAL INFORMATION

- Colour : Cardinal Red
- Power consumption (IEC) 230V : 2000 W
- Maximum Air displacement : 47 l/s
- Vacuum : 340 mbar / 34.0 kPa
- Type number dustbag : FC8023
- Duststorage capacity : 4 L
- Cord length : 9 m
- Filter system : Classic S-Bag long performance
: 3 layer permanent motor protection filter
: Ultra clean air washable HEPA13 exhaust filter
- Dimensions of cleaner : 472 x 324 x 276 mm
- Dimensions of packaging : 593 x 393 x 296 mm
- Net weight : 6.3 kg
- SAP coding : FC9174/01

ACCESSORIES

- Nozzle : Tri-Active all purpose nozzle
- Special Nozzle : Turbo Brush Nozzle
- Tubes : Metal lacquered 3-piece telescopic tube
- Accessories : Brush, crevice nozzle and small nozzle
- Accessory storage : Active accessory storage bridge in handgrip
- Coupling : Button coupling

OPTIONAL (accessories)

- FC8021 : S-bag Classic
- FC8022 : S-bag Clinic
- FC8023 : S-bag Anti-Odour
- FC8031 : Super Clean Air HEPA filter, HEPA12 exhaust filter
- FC8038 : Ultra clean air washable HEPA13 exhaust filter

DISASSEMBLY- AND RE-ASSEMBLY ADVISE

- Open the appliance, first remove the filter cover (item 22) and then remove the 2 screws (A) of the button assy (item 10).
- The button assy can be removed by lifting up the back of the assy and then pull the assy out of the appliance.
- When the dustcover and the handle have been removed, the electronics, DBFI valve assy, CW-lever and the switch lever can be removed.
- The dustchamber and the backpanel can be removed from the appliance by removing 15 screws (B and C).
- You will require a screwdriver with a 14.5 cm long shrank for this. Screwdriver 4322 009 08490 for T15 can be used.
- When the cordwinder has been taken out, the final screw (D) for releasing the lower front from the appliance can be removed.
- When the repair is finished, check whether all functions of the appliance work properly.
- To disassemble the cordwinder, use TORX screwdriver no. T10, which is one of a set consisting of T20; T15; T10; T9; T8; T7 and T6 (code number 4822 395 505145).

REPAIR INSTRUCTION

- Cotton dustbags, are used in countries in which paper dustbags are not available.
- If the reel half spring unit is replaced, shaft G must be lubricated with **silicone grease**. Do not apply any silicone grease to or spill any grease on terminals (37) or conductors (36).
- The cord winder spring must be tensioned to the maximum level and then be rewound approx. 1.5 turn.
- Item 14, air valve, opens to cool the motor if the air displacement is too low or if the airflow is blocked.
- If the function of the electronic control unit is not required, the Triac must be short-circuited in the manner shown in the circuit diagram.
- When the vacuum cleaner is used to suck up fine dust the pores of the dustbag may become clogged, causing the passage of air through the dustbag to become obstructed. As a result, the dustbag-full indicator will indicate that the dustbag needs to be replaced, even though the dustbag is not full at all.
